SUMMARY

Entry-level Frontend Developer with proficiency in JavaScript (ES6+), HTML5, CSS3, and Angular. Experienced in building responsive, cross-browser compatible web applications and dynamic user interfaces. Familiar with RESTful APIs, component-based architecture, and version control (Git). Focused on writing clean, maintainable code and improving performance and user experience. Seeking to contribute to scalable frontend solutions in a professional development environment.

PROFESSIONAL EXPERIENCE

Software Development & Bioinformatics Training | IMOLAB

07/2023 – 11/2023

- Completed comprehensive training in bioinformatics tools and computational techniques with a focus on drug discovery and genomic data analysis.
- Gained hands-on experience in drug design, including target identification, molecular modeling, and structure-based approaches.
- Applied protein docking techniques using tools such as AutoDock
- Performed DNA sequencing analysis, including sequence alignment and similarity searches using BLAST and FASTA, along with basic genomic data interpretation.

EDUCATION

B.Sc. in Computer Science and Artificial Intelligence

2020 – 2024

Cairo University

Major: Bioinformatics | GPA: 3.85 / 4.0

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, C#, SQL

Frontend Development: Angular, RxJS, Bootstrap, Responsive Web Design

Backend: ASP.NET Core, .NET Core, Web API, Entity Framework Core, LINQ

API & Integration: RESTful APIs, JSON, HTTP/HTTPS, JWT Authentication

PROJECTS

Skin Disease Classification Web Application

Link: <http://omarmfarag2.github.io/skinovation>

Description: Developed a web application to classify five of the most common skin diseases in Africa using deep learning models.

Technologies: Flask, RESTful APIs, MySQL, HTML5, CSS3, Bootstrap, JavaScript, jQuery

Responsibilities:

- Designed and implemented a responsive, user-friendly frontend interface.
- Built and consumed RESTful APIs using Flask to integrate the deep learning model with the application.
- Integrated the machine learning model into the backend for real-time predictions.
- Managed and structured the database using MySQL for efficient data storage and retrieval.
- Ensured cross-browser compatibility and optimized UI performance across devices.

Meal Recipes Web Application

Link: <https://omarmfarag2.github.io/yummywebsite>

Description: Developed a dynamic web application that displays a wide variety of meals with detailed information including ingredients, origin, category, and step-by-step tutorials. Integrated external API data to provide rich and up-to-date recipe content.

Technologies: HTML5, CSS3, Bootstrap, JavaScript, jQuery, RESTful APIs.

Responsibilities:

- Built a responsive and user-friendly interface using Bootstrap and custom CSS.
- Integrated and consumed RESTful APIs to fetch and display meal data dynamically.
- Implemented search and filtering functionality by meal name, category, and area
- Developed interactive UI components using JavaScript and jQuery for seamless user experience.
